

# An ERP Buyer's Guide

Presented by:  
**Steve Weber, PaperTrl**

# Background

## Steve Weber – CEO, PaperTrl

### ▪ An ERP & AP Automation thought leader

- Co-founder & CEO of **PaperTrl**, a platform that bridges **ERPs, banks, and suppliers** for seamless payables.
- Deep expertise in **ERP integration, financial workflows, and payment automation.**
- Formerly founded **nChannel**, a leading cloud-based ERP and eCommerce integration platform

### ▪ Strategic Leadership & Industry Impact

- Built **key partnerships with Visa, U.S. Bank, and Elan Financial Services** to enhance payment solutions.
- Passionate about **helping businesses streamline ERP-based AP processes** and improve financial control and buying the best software to make that easier
- Leads PaperTrl in providing **predictable, transparent, and efficient** payment automation.

# A word from the legal team...

The information presented herein is derived from our direct interactions with the respective companies, their official websites, publicly available online documentation, communications with partner support teams, and thorough efforts to obtain information from each cited source.

The information has been gathered over the last 24 months and while we strive for accuracy and completeness, we cannot guarantee that all information is current or free from errors. This presentation is for informational purposes only and does not constitute professional advice. We disclaim any liability for actions taken based on the information provided herein.

# The Revenue That Never Was:

Industry  
Leading  
^

How an Inflexible  
ERP System  
**Blocked** Millions in  
Sales

# The Revenue That Never Was

## The Backstory

- Major group of auto dealerships in Ohio
- More than a dozen locations
- Tens of millions in parts inventory
- Largest OEM part buyer in the U.S.
- Lots of high-volume parts
- Lots of hard-to-find parts

## The Opportunity

- Become the largest seller of trusted OEM parts on eBay

## The Blocker

- The Proprietary ERP

# How did they end up here?

- Although there were alternatives in the market, management stuck with what they knew:
  - The “industry leading” platform was the industry leading platform
    - Switching seemed too risky
  - Cost of conversion seemed too high
    - Human cost
    - Disruption of business
- Required a long-term commitment to tech, and tech is not what auto dealers do
- New features were promised

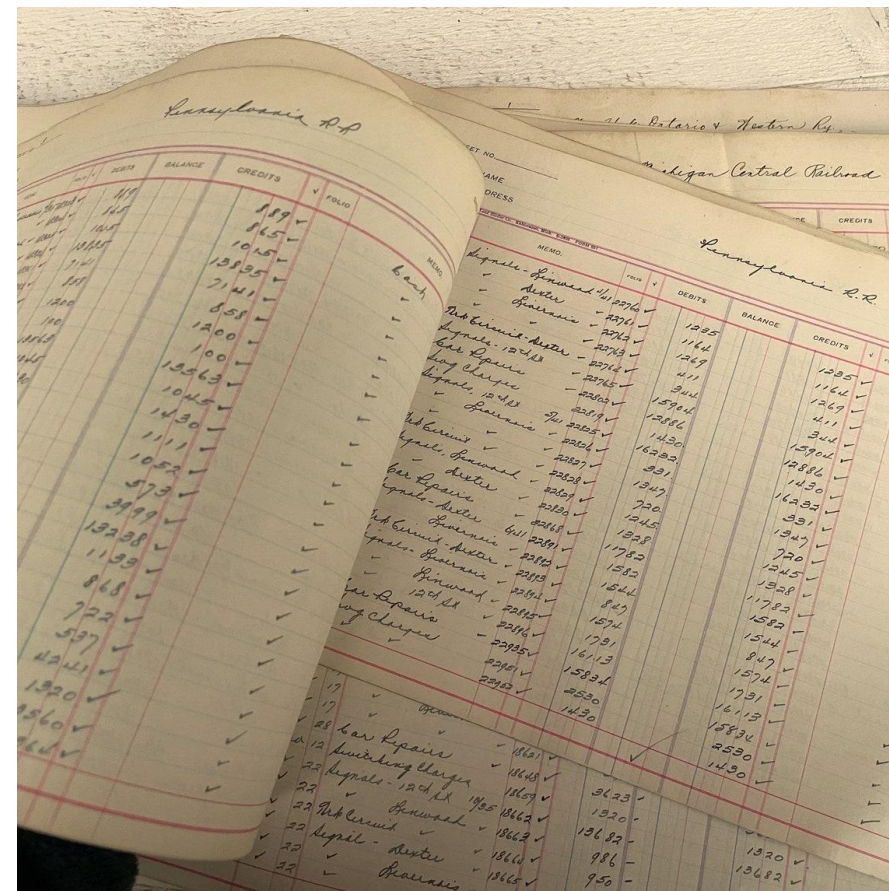

# The ERP Scorecard

CRITERIA	CRITERIA	SCORE	SCORE	SCORE	SCORE
INTERIM	CRITERIA	SCORE	SCORE	SCORE	SCORE
CUSTOMER SATISFACTION	8/10	7/10	7/10	9/10	9/10
	8/10	8/10	7/10	7/10	3/10
OPERATIONAL EFFICIENCY	7/10	7/10	7/10	7/10	7/10
FINANCIAL EFFICIENCY	7/10	7/10	7/10	9	9
FINANCIAL PERFORMANCE THIS QTR	8	91	↓	☆☆	☆☆☆
★★★★	☆☆	☆☆☆	☆☆	☆☆☆	☆☆☆

# Why an ERP scorecard?

- Publishers all use the same buzzwords
  - Cloud-based
  - AI-powered
  - Scalable
  - User-friendly
  - Customizable
  - Business Intelligence
- The core features have become commoditized
  - General ledger
  - Bank integration
  - Dashboards
  - Excel integration
  - Budgeting & forecasting

# At face value, they all look the same

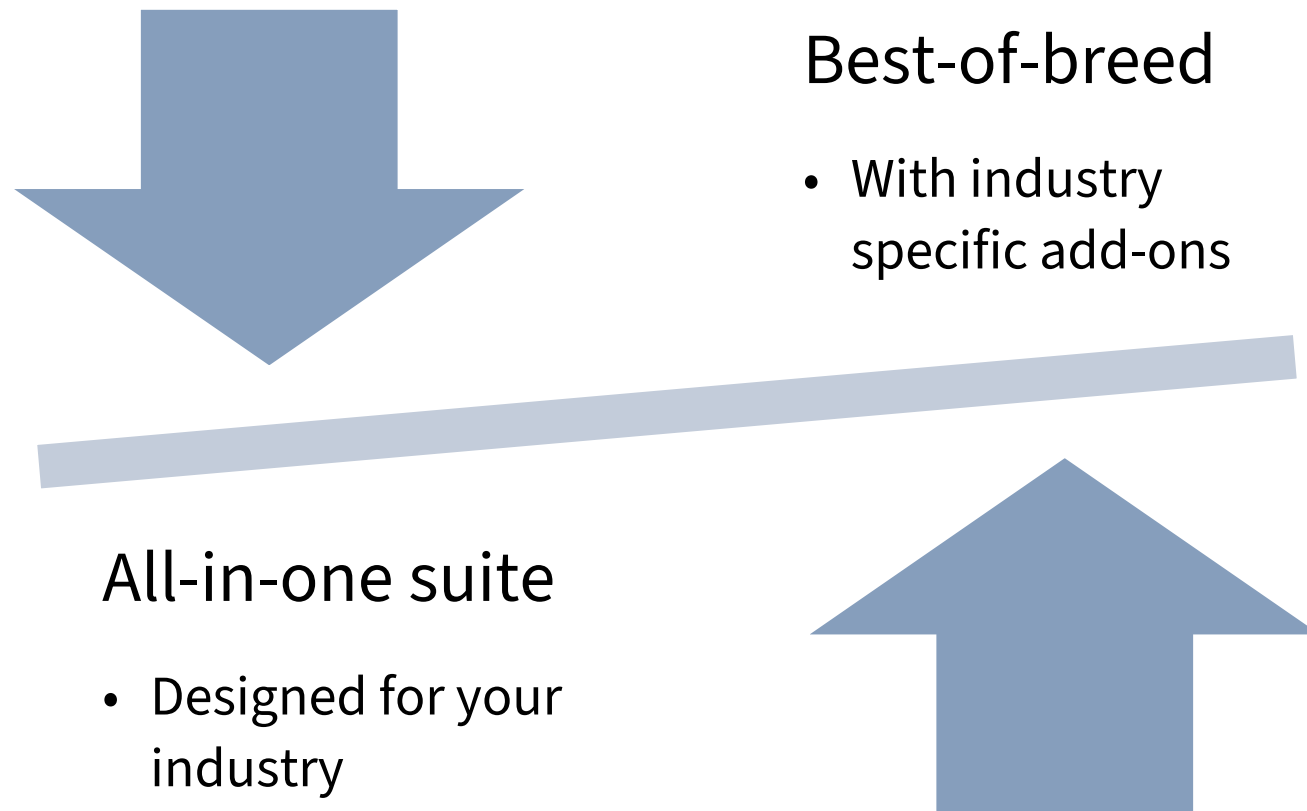

# But when we look under the hood...

The Hot Buttons - Capability	
User interface aesthetics and initial ease of use	✓
Feature checklist satisfaction	✓
Upfront costs and licensing model	✓
Vendor popularity (especially in my industry)	✓
Vendor's time in market	✓

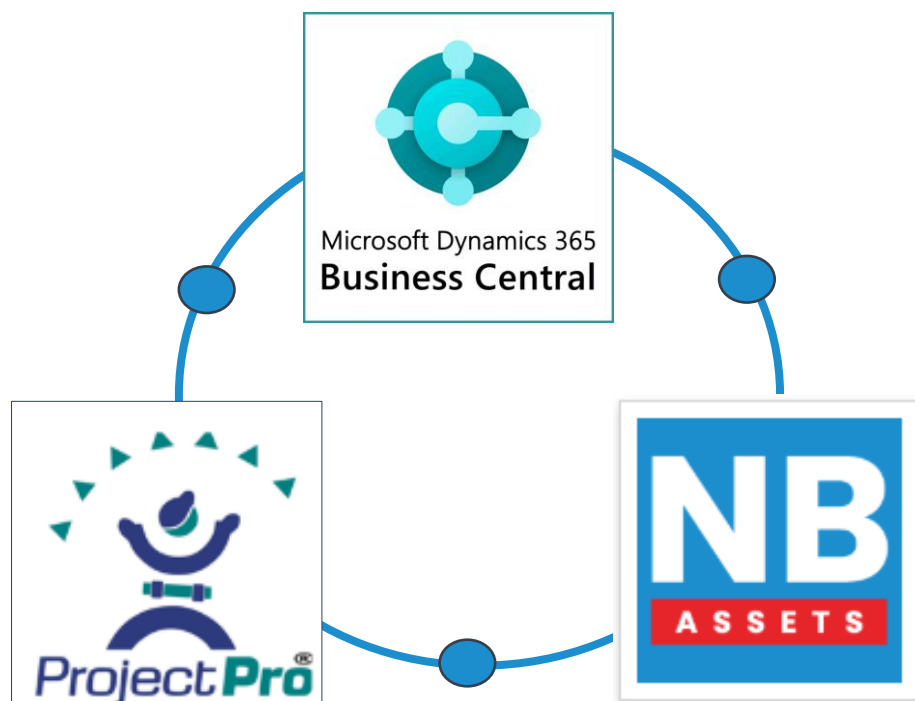

The Seldom Discussed - Adaptability	
Software Architecture	
Data Integration & API	
Vendor Support & Ecosystem	
Master Data Management	

# Other considerations: Best of breed vs. designed for your industry

# For example, in construction:

## Best-of-breed

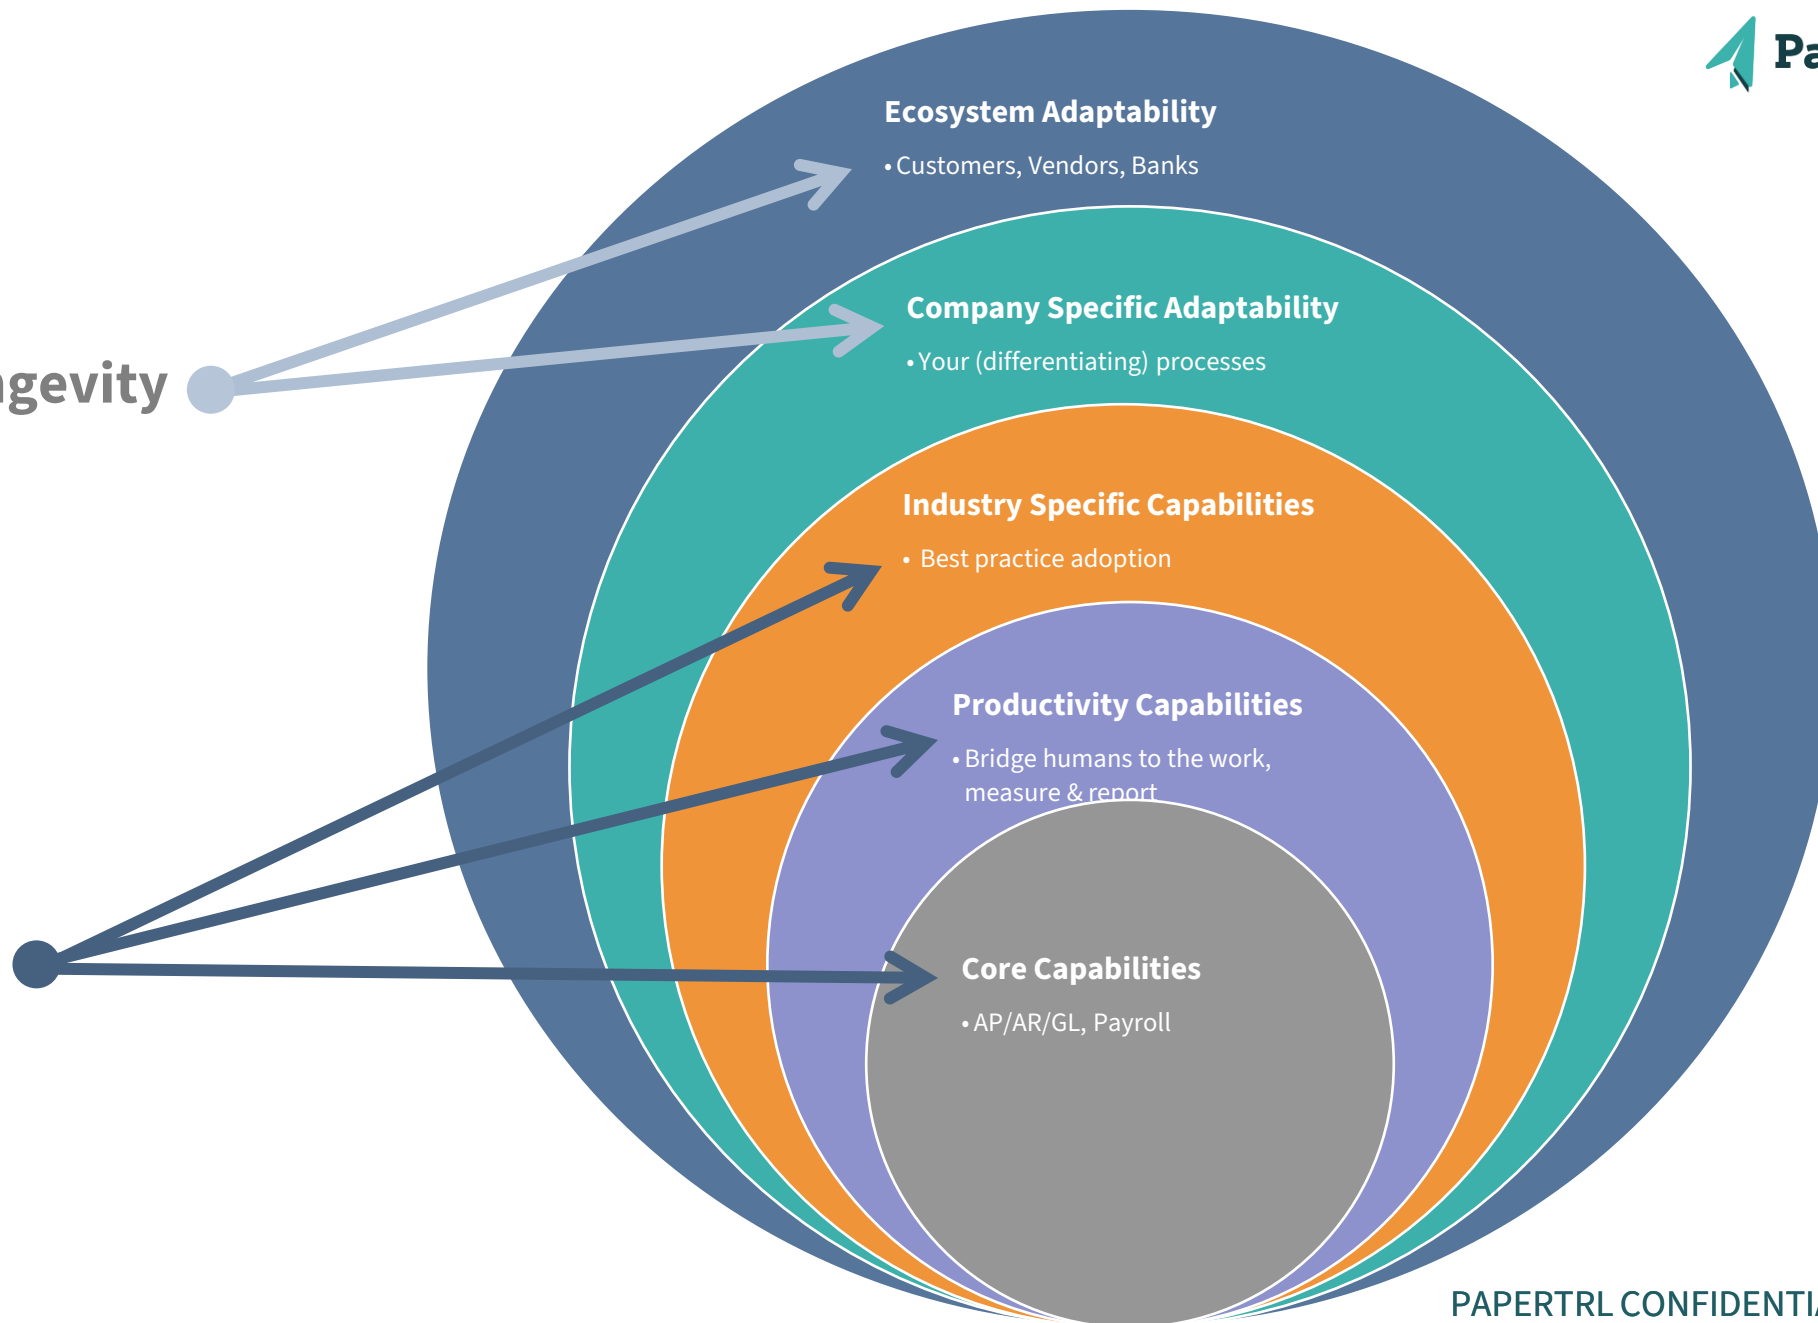

## All-in-one

**Adaptability:**  
determines longevity  
& flexibility

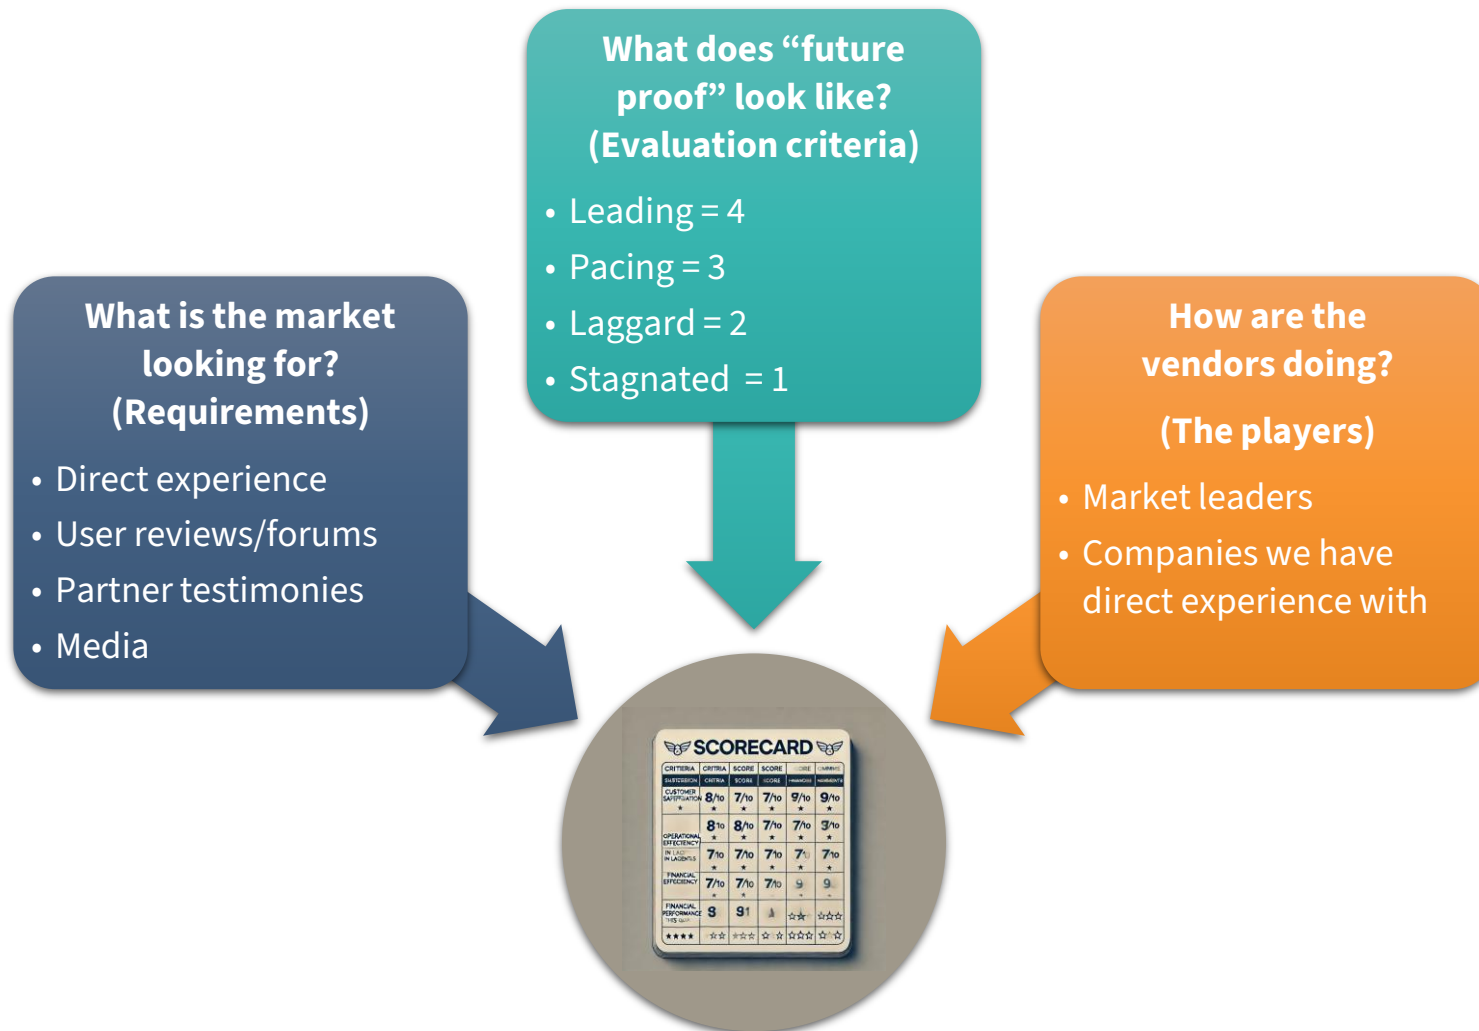

**Capability:**  
determines fit

# Long-term value: Capability vs. Adaptability

# How we evaluate ERP Platforms

# On your own: Evaluating Capability

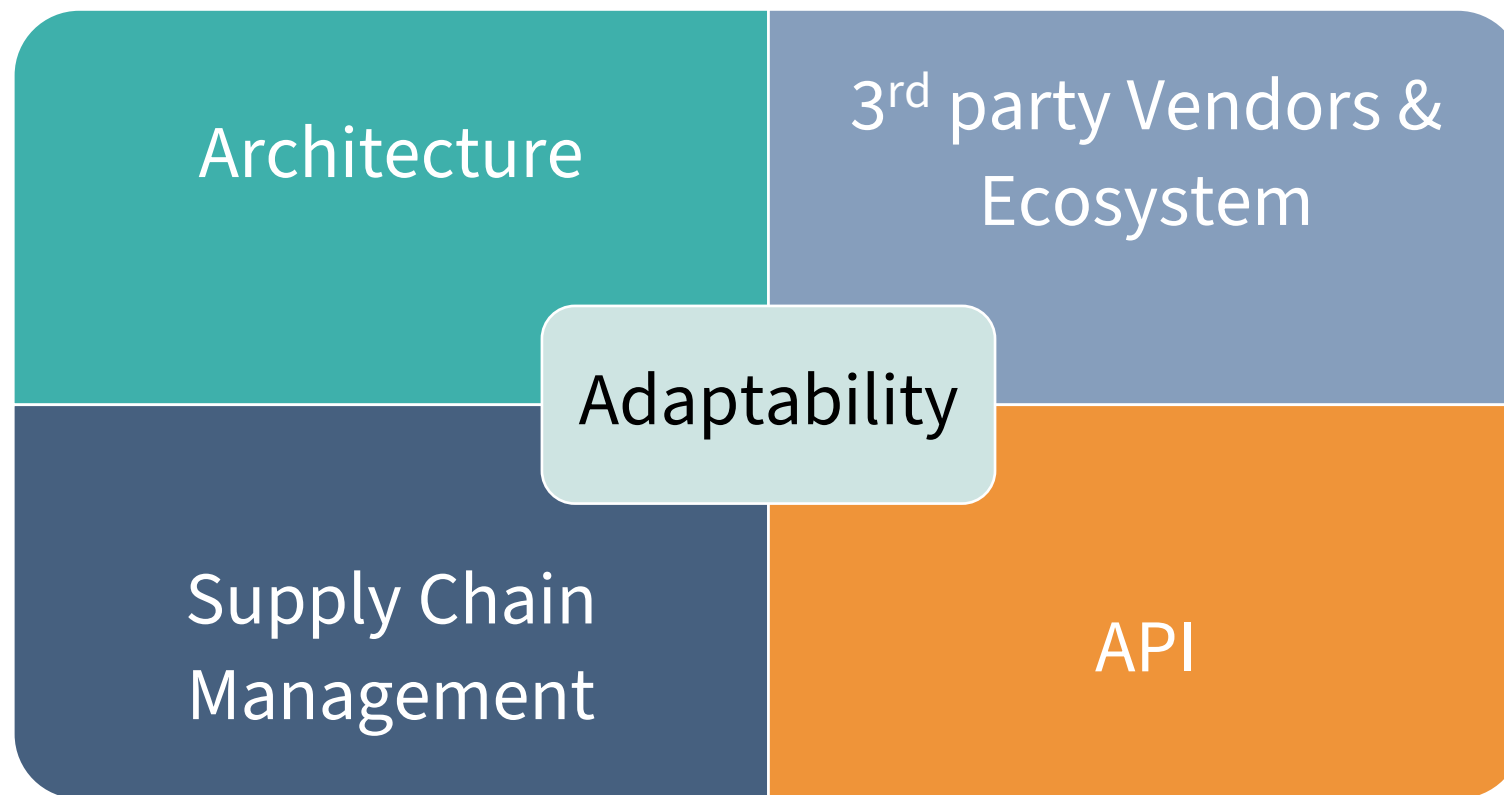

The Hot Buttons - Capability	
User interface aesthetics and initial ease of use	✓
Feature checklist satisfaction	✓
Upfront costs and licensing model	✓
Vendor popularity (especially in my industry)	✓
Vendor's time in market	✓

# Our Focus: Evaluating Adaptability

# Architecture: Why does it matter?

## Does it have good bones?

- Integration complexity
- Cost and time to implement
- Change management
- How happy you'll be with add-ons
- Flexibility to meet future needs

# Architecture, why it matters:

vs

# Scoring the architecture

- The leaders:
  - Microsoft Dynamics Business Central
  - Intuit
  - Oracle
  - Accumatica
  - Xero
  - Odoo
  - Sage Intacct
- Lagging:
  - CDK
  - DelTek
- The stagnated
  - Quickbooks desktop
  - Sage 100/200/300/400
  - Microsoft Dynamics GP

Architecture	
Score	Evaluation Criteria
<b>4 – Leading</b>	<ul style="list-style-type: none"> <li>• Software packages designed for the cloud, are by definition designed using modern software architecture concepts.</li> <li>• The software should have a REST-based API. REST is the default integration standard.</li> <li>• The software can be extensively customized within a framework that allows for API support of all customizations. The software can be scaled across multiple servers to support resiliency and scalability.</li> <li>• The software uses a market-leading relational database (Oracle, MS-SQL, My SQL or a no-SQL technology like Mongo DB)</li> </ul>
<b>3 – Pacing</b>	<ul style="list-style-type: none"> <li>• The software can be customized within a framework that allows for API support of all customizations.</li> <li>• The software uses a market-leading relational database (Oracle, MS-SQL, My SQL or a no-SQL technology like Mongo DB)</li> </ul>
<b>2 – Lagging</b>	<ul style="list-style-type: none"> <li>• The software has a proprietary or file-based API</li> <li>• The software offers only modest customization</li> <li>• The software does not use a relational database (Oracle, MS-SQL, My SQL or a no-SQL technology like Mongo DB)</li> </ul>
<b>1 – Stagnated</b>	<ul style="list-style-type: none"> <li>• The software is thick client</li> <li>• The software uses a circa-1980 file-based data store by default</li> <li>• The software cannot be scaled across multiple servers</li> <li>• The software has no API</li> </ul>

# Vendors and Ecosystem: Why does it matter?

VS

# Vendors and Ecosystem: Why does it matter?

- Drive innovation
- Thriving ecosystems are indicative of software flexibility
- Protect users from price gouging
- Protection from vendor lock-in
- Ensure long-term investments in the platform

  - Odoo
  - Microsoft Dynamics Business Central
  - Intuit
  - Oracle
  - Xero
- Lagging:
  - CDK
  - DelTek
- The stagnated

Vendors & Ecosystem	
Score	Evaluation Criteria
<b>4 – Leading</b>	<ul style="list-style-type: none"> <li>• Partner Certifications – Publisher has a certification program with multiple levels and requires validated customer references for certification.</li> <li>• Developer community – The company embraces third-party developers offering them “ungated” access to API documentation and ungated access to free software for testing</li> <li>• User forms – The publisher offers opportunities both online and offline for end users to collaborate and share ideas</li> <li>• Add-on Marketplace – The publisher offers add-on software via a sponsored/hosted marketplace, including opportunities for end-users to provide satisfaction ratings – including components to address multichannel requirements</li> </ul>
<b>3 – Pacing</b>	<ul style="list-style-type: none"> <li>• Partner Certifications – Publisher has a certification program with multiple levels</li> <li>• Developer community – The company embraces third-party developers and offers tools and resources for developers online/offline</li> <li>• User forms – The publisher offers opportunities both online and offline for end users to collaborate and share ideas</li> <li>• Add-on Marketplace – The publisher offers add-on software via a sponsored/hosted marketplace, including opportunities for end-users to provide satisfaction ratings</li> </ul>
<b>2 – Lagging</b>	<ul style="list-style-type: none"> <li>• Partner Certifications – Does not offer certifications for partners or assigns partner exclusive territory</li> <li>• Developer community – The company embraces third-party developers and offers tools and resources for developers online/offline</li> <li>• Offers no support for developers on-line/offline</li> <li>• Has no add-on marketplace</li> </ul>
<b>1 – Stagnated</b>	<ul style="list-style-type: none"> <li>• Partner Certifications – Does not offer certifications for partners</li> <li>• Limits developers, often citing “quality control”</li> <li>• Pay-to-play model</li> <li>• Offers no support for developers on-line/offline</li> <li>• Company directly provides all implementation and support services</li> <li>• Zero to few – add-ons offered</li> </ul>

# Application Programmers Interface (API): Why does it matter?

- The core of software adaptability
- Eliminate manual data entry/synchronization
- Eliminates imports/exports
- Allows for third-party apps to be connected
- Enables the Ecosystem
- Allows you to differentiate on process

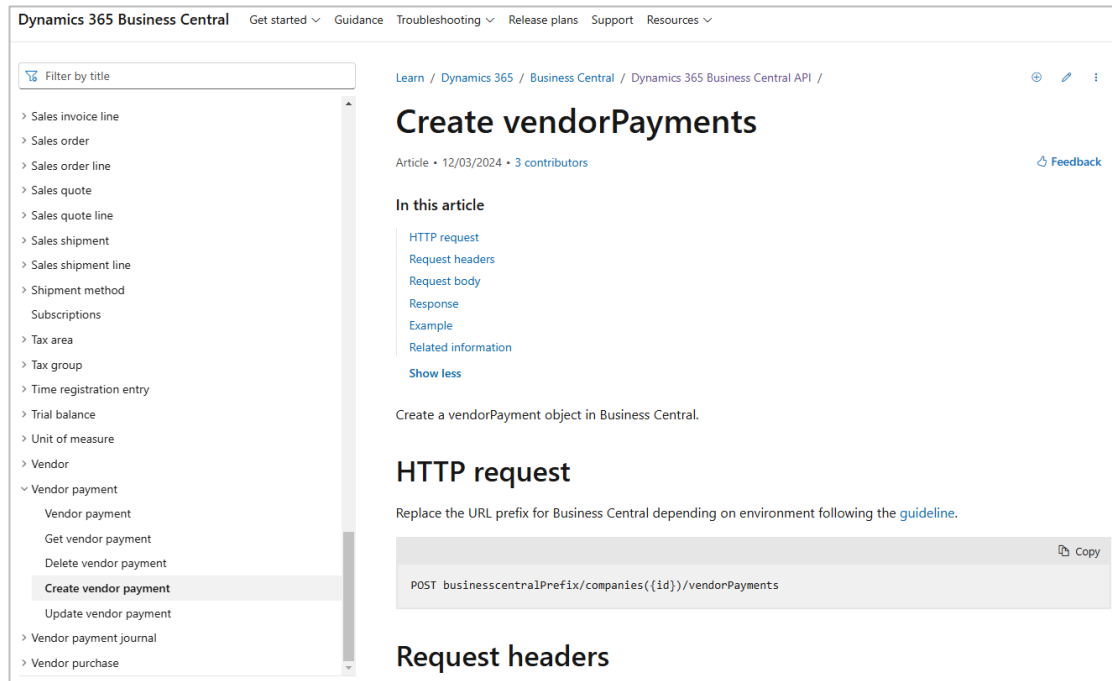

# API

- Response
- Example
- Related information

Show less

Create a vendorPayment object in Business Central.

### HTTP request

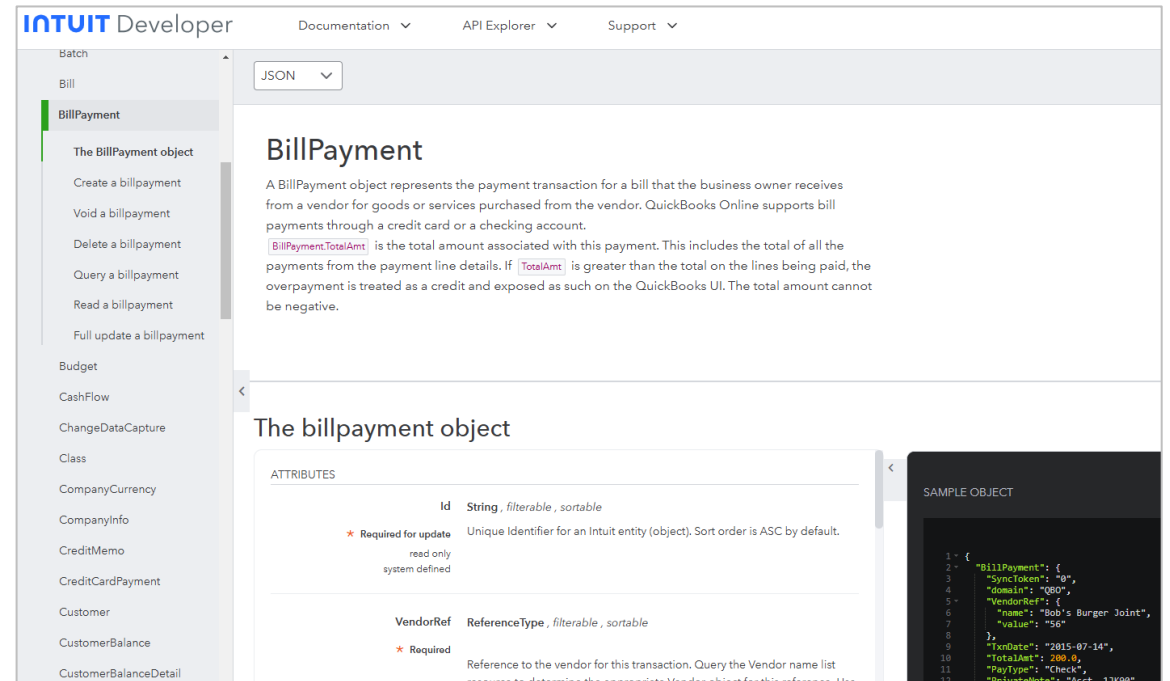

Replace the URL prefix for Business Central depending on environment following the [guideline](#).

```
POST businesscentralPrefix/companies({id})/vendorPayments
```

Copy

### Request headers

## QuickBooks Online

**INTUIT Developer** | Documentation | API Explorer | Support

Batch | JSON

### BillPayment

The BillPayment object

- Create a billpayment
- Void a billpayment
- Delete a billpayment
- Query a billpayment
- Read a billpayment
- Full update a billpayment

Budget

CashFlow

ChangeDataCapture

Class

CompanyCurrency

CompanyInfo

CreditMemo

CreditCardPayment

Customer

CustomerBalance

CustomerBalanceDetail

A BillPayment object represents the payment transaction for a bill that the business owner receives from a vendor for goods or services purchased from the vendor. QuickBooks Online supports bill payments through a credit card or a checking account.

`BillPayment.TotalAmt` is the total amount associated with this payment. This includes the total of all the payments from the payment line details. If `TotalAmt` is greater than the total on the lines being paid, the overpayment is treated as a credit and exposed as such on the QuickBooks UI. The total amount cannot be negative.

### The billpayment object

ATTRIBUTE	TYPE	DESCRIPTION
<b>Id</b>	String, filterable, sortable	Unique Identifier for an Intuit entity (object). Sort order is ASC by default.
<b>VendorRef</b>	ReferenceType, filterable, sortable	Reference to the vendor for this transaction. Query the Vendor name list resource to determine the appropriate Vendor object for this reference. Use

**Attributes:**

- Id** (String, filterable, sortable): Unique Identifier for an Intuit entity (object). Sort order is ASC by default. *Required for update*, read only, system defined.
- VendorRef** (ReferenceType, filterable, sortable): Reference to the vendor for this transaction. Query the Vendor name list resource to determine the appropriate Vendor object for this reference. Use. *Required*.

```
1 {
2   "BillPayment": {
3     "SyncToken": "0",
4     "domain": "QB0",
5     "VendorRef": {
6       "name": "Bob's Burger Joint",
7       "value": "56"
8     }
9   },
10  "TxnDate": "2015-07-14",

14 }
```

# Supply Chain: Why does it matter?

**Nearly all companies of all sizes do some type of B2B transactions with vendors**

- The higher the volume, the larger vendor teams (AP, logistics, order management) will grow
- Connectivity to all these functions drive exponential efficiency
- Leaders across industries demonstrate supply chain proficiency

# Supply Chain Integration:

- **The leaders:**
  - Odoo
  - Microsoft Dynamics Business Central
  - Intuit
  - Oracle
  - Xero
- **Pacing**
  - Blackbaud
- **Lagging:**
  - QuickBooks desktop
  - Sage 100/200/300/400
  - Microsoft GP
- **The stagnated**
  - DelTek
  - CDK
  - Trimble

Supply Chain Integration	
Score	Evaluation Criteria
4 - Leading	<ul style="list-style-type: none"> <li>• Standards-based API that allows for your multichannel platform to integrate/exchange transactions in real-time</li> <li>• API support for supply chain transactions including vendor master data, purchase orders, receipts, invoices and payments</li> <li>• Support for standards-based B2B transactions (EDI)</li> </ul>
3 - Pacing	<ul style="list-style-type: none"> <li>• Standards-based or proprietary API that allows for your ERP to integrate/exchange transactions in real-time</li> <li>• Support for external locations</li> <li>• Availability of third-party B2B integration platform</li> </ul>
2 - Lagging	<ul style="list-style-type: none"> <li>• Software has standard or proprietary API that can be integrated into a single-inventory framework</li> <li>• No third-party B2B integration support</li> </ul>
1 - Stagnated	<ul style="list-style-type: none"> <li>• Has no API to support B2B transactions</li> <li>• Software publisher locks customers into their B2B network (transactions/payments)</li> <li>• Has no direct support for single inventory functions</li> </ul>

# Vendor Ratings

# ERP Vendor Matrix

	Odoo	Microsoft Bus. Central	QuickBooks Online	Sage Intacct	DelTek	Oracle NetSuite	QuickBooks Desktop
<b>Overall</b>	4.0	4.0	3.9	3.5	1.1	4.0	2.5
<b>Architecture</b>	4.0	4.0	3.7	3.7	1.0	4.0	1.0
<b>API</b>	4.0	4.0	4.0	3.3	1.0	4.0	1.0
<b>Vendors and EcoSystem</b>	4.0	4.0	4.0	4.0	1.2	4.0	4.0
<b>Supply Chain Management</b>	4.0	4.0	4.0	3.2	1.0	4.0	4.0

# Final takeaways: Choosing the right ERP

- **Capability vs. Adaptability** – Long-term success depends on both.
- **Beyond the Buzzwords** – True ERP value lies in integration, flexibility, and vendor ecosystem.
- **Future-Proofing Matters** – The best ERP grows with your business.
- **Scoring & Evaluation** – Use structured criteria, not just surface-level features.
- **Your ERP is a Competitive Advantage** – The right system drives revenue, not roadblocks it.

# Thank You!

**Steve Weber**
